

Use of melamine resin sheets/films to coat three-dimensionally structured surfaces/moldings

Abstract

- 5 The present invention relates to the use for coating three-dimensionally structured surfaces and/or moldings of melamine resin sheets and/or films produced from cellulosic fiber materials post- or pre- and post-impregnated with an aqueous solution comprising
- 10 (i) a melamine-formaldehyde condensate,
(ii) an etherified melamine-formaldehyde condensate, and
(iii) a polymer dispersion.
